

### **REMARKS**

The present application has been amended in response to the Examiner's Office Action to place the application in condition for allowance. Applicant, by the amendments presented above, has made a concerted effort to present claims which clearly define over the prior art of record, and thus to place this case in condition for allowance.

In the Office Action, the Examiner objected to the drawings for not showing every feature of the invention. Applicant submits herewith a new set of claims, in which the term "chamfer" is not present. It is therefore requested that the Examiner's objection to the drawings be withdrawn.

In the Office Action, the Examiner also objected to the specification for introducing new matter. In response, the specification has been amended such that the term "chamfered" has been replaced by "cambered" throughout. It is there requested that the Examiner's objection to the specification be withdrawn.

In the Office Action, the Examiner objected to claims 8-10 as failing to comply with the written description requirement and as being indefinite. Applicant submits herewith replacement claims which Applicant believes overcome the Examiner's objections.

In view of the above amendments and remarks, Applicant respectfully requests that the present application be passed to issuance.

Should the present claims not be deemed adequate to effectively define the patentable subject matter, the Examiner is respectfully urged to call the undersigned attorney of record to discuss the claims in an effort to reach an agreement toward allowance of the present application.

Respectfully submitted,

Dated: November 10, 2006
